

Commitment to our clients

Diane Hayes, owner and certified mastectomy fitter at Kelly's became an Elite member of the Amoena Fitter Association for 5+ years fitting in 2008. As such, she is committed to providing clients with the best possible fitting.

In 2008-2009, Kelly's became Canada's highest volume fitter in the mastectomy industry and has held that position ever since. With this status, it becomes clear to clients when entering the boutique that the myth regarding unavailability of stylish, beautiful, sexy and functional lingerie and clothing after a mastectomy just does not exist.

Engagement envers notre cliente

Mme Diane Hayes, propriétaire et ajusteuse agréée à Kelly's est membre de l'Association des techniciennes en ajustements d'Amoena célébrant 5 ans et plus d'excellence. Comme tel, elle se commise à chaque cliente de parvenir le meilleur ajustement possible.

En 2008-2009, Kelly's devient la boutique qui exécute le plus grand nombre d'ajustement au Canada et maintient cette position depuis.

L'instant que la cliente entre la boutique, il est apparent que la sélection de lingerie et vêtements disponibles pour la femme qui a subi une mastectomie est abondante.

*the Kelly story...
how and why*

Kelly, even at her young age, was one of the bravest and proudest women I had the honor of knowing. Kelly: my sister-in-law, my youngest brother's wife, my niece's mother; was diagnosed with inoperable inflammatory carcinoma in November 2002. She had aggressive chemo treatment until May 2003 when she underwent a double mastectomy then continued aggressive chemo and radiation therapies until sadly, she lost her battle February 20, 2005. Her courage, strength and faith overwhelmed, touched and taught many along her journey. She would often say, "you take what is handed to you and you do with it all you can". Today, her spirit lives on in the hearts of family and friends; from her portrait, she watches over all who visit the boutique.

...Kelly's Mastectomy Boutique

Kelly's diagnosis prompted me to fulfill a long-time interest to work with women with mastectomies. In June 2003, with Kelly's blessing, the boutique became her namesake and **Kelly's Mastectomy Boutique** opened its doors. A constantly growing clientele permitted me to open one of the largest mastectomy stores in the country, to create pleasant and comfortable surroundings for clients and make available a larger selection and variety of mastectomy garments and products. Every day, I have the distinct pleasure of meeting the bravest, strongest, most beautiful and incredible women... my clients.

La boutique porte fièrement le nom de ma belle-sœur, l'épouse du plus jeune de mes frères, la mère de ma nièce Caroline; Kelly, diagnostiquée en novembre 2002, subi de nombreux traitements chimiothérapie and radiothérapie ainsi qu'une ablation bilatérale. Kelly est succombée de son cancer du sein en février 2005, mais son esprit sourit toujours sur sa famille et ses amies. Sa photo règne et veille sur la boutique.

The face of mastectomy lingerie is changing...

At Kelly's Mastectomy Boutique we offer full and partial breast prosthesis fitting services after a mastectomy or lumpectomy, mastectomy brassiere fitting, mastectomy swimwear, compression garments for lymphedema, a line of headwear for capillary loss and swim caps. We offer a complete range for most body and surgery types fitted only by certified fitters. A compression garment fitter measures for compression sleeves, truncal edema garments and gloves for those patients suffering post-mastectomy, lumpectomy or post-treatment lymphedema.

Post-surgical camisoles with soft fiberfill or foam prosthesis adapted to fit offer women a very comfortable solution for wearing immediately after surgery. The Been-a-Boob prosthesis is a great alternative for workout and swimming.

Les sélections de vêtements et prothèses après mastectomies ont beaucoup évolué. La cliente chez Kelly's est toujours ajustée par une technicienne certifiée afin de bien répondre à ses besoins. On vous offre aussi une gamme de vêtements compressifs pour les lymphœdèmes au bras ou la poitrine.

Fitting for prosthesis occurs minimum six to eight weeks after surgery. This allows time for healing, reduction of swelling ensuring a better, more accurate fit.— Afin d'assurer des résultats favorables, il est fortement suggéré d'attendre 6 à 8 semaines après la chirurgie pour l'ajustement de la prothèse qui permet une guérison adéquate et moins de gonflement de la poitrine.
